

# APUV-1

Our most precious resource just got more precious.

Aqua-Pure helps you conserve even more; enabling you to use your alternate water source in your home not just on the garden.

The Aqua-Pure Drink Guard is designed to be installed in line for tank or town water, reducing sediment, offensive taste/odour and disinfecting the water with ultraviolet light, providing protection from water borne bacteria and parasitic cysts such as giardia and cryptosporidium.

Filter system approved to AS/NZS CSPR 14:1:2003 for electro magnetic radio interference and AS61010.1:2001 Australian Electrical Safety Compliance Certificate QO41679

### maintenance

The Drink Guard system requires annual replacement of the filter cartridges and ultraviolet lamp to maintain maximum efficiency.

Please see operating instructions included with system for full details.

#### Housing 1: Model No. API 10

Aqua-Pure sediment reduction filter cartridge

¥ For reduction of sediment, dirt, rust, organic matter and other particulate contaminants down to 5 micron (nominal) in size.

#### filter cartridge specifications

Micron	5 (nominal)
Height	249mm
Max. Temp	40°C

#### Housing 2: Model No. API 87

Aqua-Pure Safeguard™ multi-purpose premium carbon filter cartridge.

¥ The Safeguard filter cartridge reduces sediment, offensive taste/odour, chlorine, turbidity and organic matter down to 0.5 micron (nominal) in size.

¥ Provides protection from giardia, cryptosporidium and other filtrable cysts.

#### filter cartridge specifications

Micron	0.5 (nominal)
Height	249mm
Max. Temp	40°C

#### UV Lamp: Model No. UV-S287RL

¥ The ultraviolet disinfection system contains an ultraviolet lamp which disinfects incoming water.

#### specifications

Flow	7.5 lpm @ 30mj/cm <sup>2</sup> and 95% UVT
Min. Pressure	200 kPa
Power Source	240 v

# Aqua-Pure®

WATER PURIFIERS

## Drink Guard® ultraviolet disinfection water filter system

**1 year**  
warranty  
\*excludes cartridges

safe, great tasting drinking water

29-APL1UV-1 (081)

## benefits\*

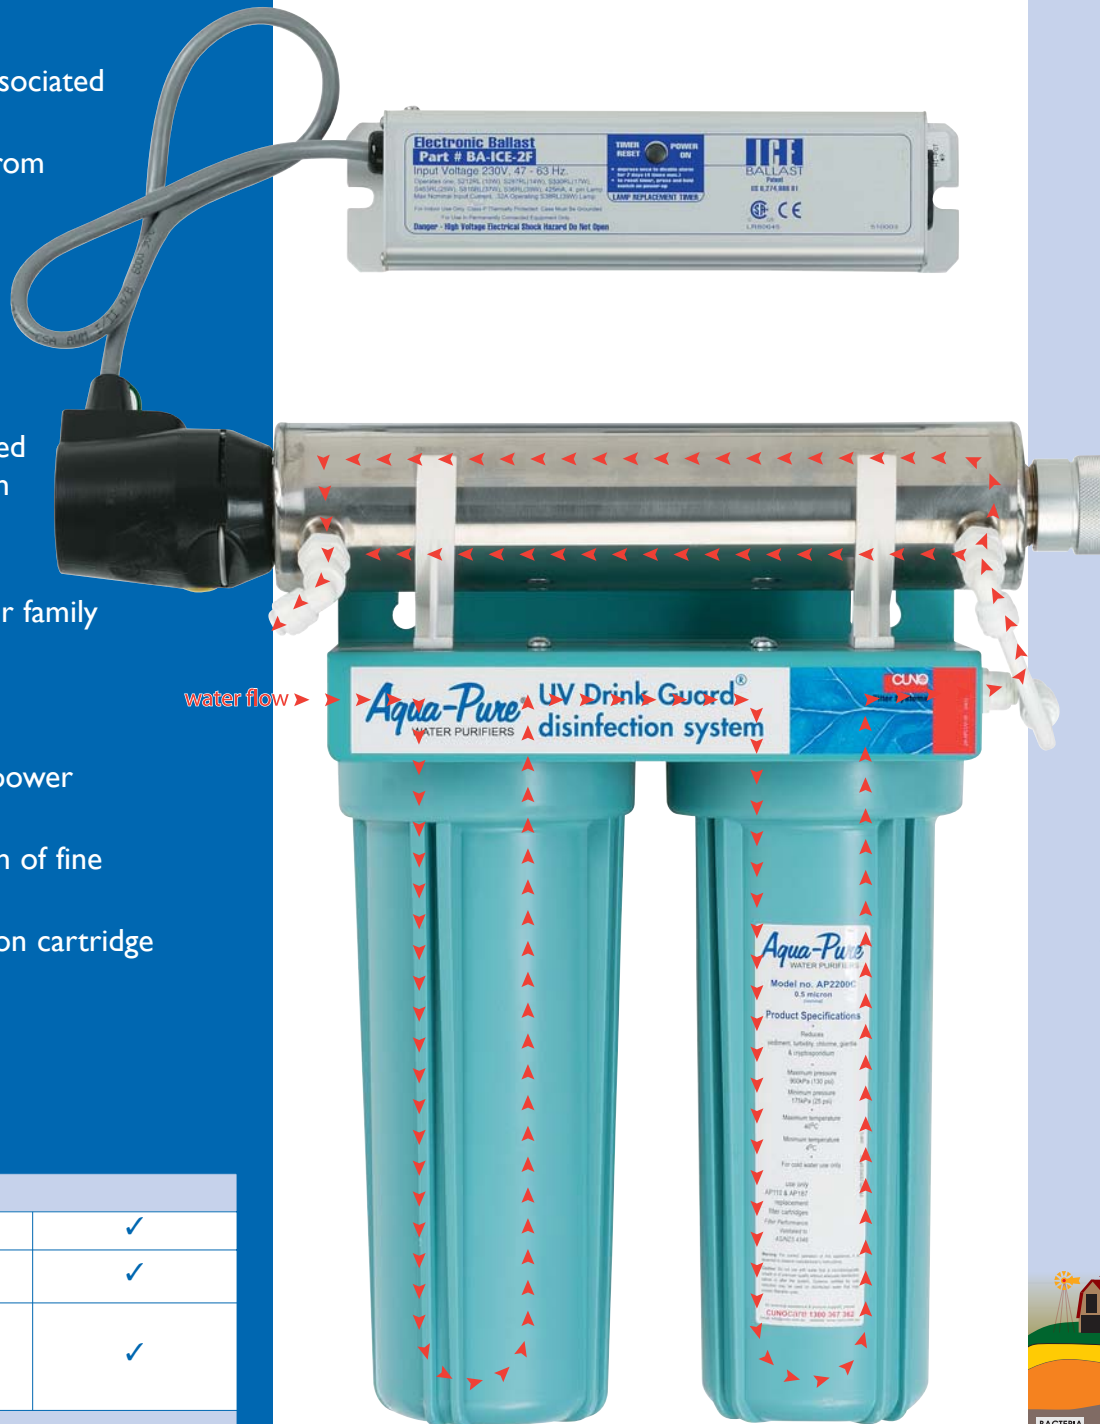

- reduces sediment and odour associated with tank water
- reduces plastic or metal taste from tank water
- superior protection from infectious water borne bacteria
- protection from parasitic cysts such as giardia and cryptosporidium
- cost effective, eliminates the need for expensive hygienic collection equipment
- simple undersink installation
- peace of mind that you and your family are protected

## features

- UV sterilisation unit with LED power indicator
- pre-filter cartridge for reduction of fine sediment
- offensive taste & odour reduction cartridge
- electronic ballast
- dedicated drinking water faucet

## specifications

performance	
reduction of sediment 5 micron (nominal)	✓
reduction of chlorine, taste/odour	✓
control of microbiological contaminants, bacterium, viruses & cysts including giardia & cryptosporidium	✓
product	
pressure min. 200 kPa, max. 900kPa, temp max. 40°C, Inlet/Outlet 1/4" quick connect. Power source - 240v	

\*Warning: The Aqua-Pure UV water filter system is recommended for treatment of tank water only. Do not use for treatment of water from dams, bores, rivers or creeks. Failure to observe this warning will void manufacturers warranty.

# Aqua-Pure®

## WATER PURIFIERS

The Aqua-Pure Drink Guard® protects users from water borne bacteria *n.pl.*

unicellular microorganism lacking an organised nucleus

## the earth's hydrocycle

### the many ways in which water may become contaminated

The hydro-cycle is a natural process with evaporation as the main catalyst. All pollutants introduced into our environment whether it be from your household, motor vehicles, chemical spraying or animal fowling may contaminate your tank water. Even under normal use bacteria and parasitic cysts such as giardia and cryptosporidium may also infect tank water.
