### Reduces:

#### SEDIMENT

##### Problem:

Sediment can damage plumbing and appliances over time. It includes rust particles that can cause brown, yellow or orange spots on clothing, fixtures and toilets

##### Effect of Contaminant:

Unpleasant drinking experience with solids and discolouration of water. Damages and blocks internals of taps, shower roses and hot water cylinders

##### AP9000 Reduces:

Sand, silt, particulates and rust

#### TASTE & ODOUR

##### Problem:

Chlorine is used by water treatment plants to kill harmful bacteria and organisms. It has a recognisable taste and odour that can be unpleasant

##### Effect of Contaminant:

Affecting the taste and odour of water. High levels are drying to skin, irritating skin conditions such as eczema. Can cause carcinogenic by-products when combined with certain contaminants common in most water sources.

##### AP9000 Reduces:

Chlorine, offensive taste and odours

### Protects From:

#### CYSTS, GIARDIA & CRYPTOSPORIDIUM

##### Problem:

Encapsulated forms of single cell parasites that may be present in drinking water and resistant to normal chlorination

##### Effect of Contaminant:

Ingested cysts can cause abdominal cramping and diarrhoea and in immune deficient people (Children and elderly) can cause death

##### AP9000 Reduces:

Giardia, Cysts and Cryptosporidium
