

APBT301 & APBT301C

Aqua-Pure benchtop water filters are designed to sit on the kitchen sink or benchtop and connect in seconds to most aerated tap outlets by way of the diverter valve fitted to the filter. This diverter valve diverts water to the sink or filter as required.

As the portable benchtop weighs only 1.2kg, you may use it as a home water filter or taken along when travelling.

The benchtop features a high-reach chrome swivel spout which is convenient for filling jugs or high containers.

When connected and maintained correctly, the Aqua-Pure benchtop provides an ample, economical supply of fresh tasting, quality water for drinking, cooking and beverages. For around 2 cents per litre*.

Aqua-Pure offer 2 models;
APBT301 standard
APBT301C deluxe

replacement cartridges
